Managers

Non-Project
 WORLD-WIDE
 PROJECT MANAGEMENT
 METHODOLOGY
 FocusPM

Today's Topics

- n Project Management Initiative
- n History of Development
- n Content and Strategy
- n Required inputs to FocusPM
- n Key Business Points
- n Methodology Overview
- n Benefits of FocusPM
- n Why choose HP?

"FocusPM: It will change the way we do business."
Jim Sherriff

Current State

- n The size and complexity of solution projects have been consistently growing
- n Different result while delivered by different PM (even excellent)
- n Project Managers use methodologies inconsistently
- n Best practices are not captured, shared, or reused
- n The Project Manager's role, responsibility and authority are not clearly defined
- n Client dissatisfaction and low profitability are issues in many projects

Future State

- n Projects are a major contributor to our profitability
- n Clients perceive our Project Management as one of HP's competitive advantages
- n The Project Manager is perceived as a highly desired job with HP with clear authority and responsibility to make projects a success
- n Using a single global methodology and tools contribute to successful projects
- n Knowledge capture and reuse greatly increase the effectiveness of our Project Managers

Project Management Initiative

Objective 1:

- n Enable the implementation of a consistent Project Management methodology world-wide

Objective 2:

- n Clearly define role and authority as well as measures, rewards, and scoping of Project Managers

Objective 3:

- n Rapidly enhance our Project Management capability through development and hiring

Role of Project Manager

- n Responsible for **profitability (scope / terms & conditions / cost / schedule)** of project
- n **Key role in selling process** -- qualifying project and recommending GO / NO GO
- n Assesses and manages **risk** during selling and delivery process
- n Manages **project team** during the project
- n Manages **relationship** between clients and HP / partners / subcontractors
- n Major relationship with **CBM, CBL & Principal Consultant** in pre-sales

- n  **Ensuring the success of the project**

PM's are Empowered to:

- n Have sole accountability for profitability of projects
- n Have a major responsibility in the selling process
- n Have authority to be the only manager of project delivery
- n Have authority to be the major interface to client during the project

è Does **NOT** mean that Project Manager is the most important person for project success -- entire HP Team is important for project success

WORLD-WIDE PROJECT MANAGEMENT METHODOLOGY FocusPM

History of Development

- n Project Managers asked for a more professional methodology for planning and implementing projects

- n Based on previous principle (CPLC) & HP best practices

- n November 1996 initial strategy, January 1998 Final Review

- n WW Review Team

Compared to Previous Methodology

- h Is consistent with the Project Management Institute's (PMI & Prince2 standards)
- h Incorporates HP best practices
- h Provides rigor and detail in the planning phases
- h Includes a robust toolkit in the planning and implementation phases
- h Meets the need of Project Managers to manage increasingly larger and more complex projects

Benefits of FocusPM

- ⌋ Improved HP bottom line by cutting losses on projects
- ⌋ Ensures consistent world-wide approach to client projects (will be used by HPC, ISBU, and OSD)
- ⌋ Developed under leadership of global HPC/ ISBU Steering Committee
- ⌋ Incorporates WW HPC/ ISBU best practices and industry standard Project Management methods and terminology (PMI and Prince2)
- ⌋ Can be used for any type of project (Scaleable)
- ⌋ Provides a full set of forms, tools and templates
- ⌋ Includes a rigorous process for assessing / managing risk

Components of FocusPM

Documentation

- Methodology Guide (Phases / Activities / Tasks)
- Reference Manual (Processes and Techniques)
- Toolkit (Forms, Templates and Examples)
- Quick Reference Card (Quick Overview)

Electronic Tools

- Guide, Manual and all Tools on the Web
- Continuous Improvement accessed through the Web
- Web based Knowledge Sharing (Project Snapshots and Best Practices)
- Documentation Management System (under investigation)

Training and Communication

- 'Applying FocusPM' for Project Managers – 2 days
- 'Applying FocusPM' for Non-Project Managers – 1/2 day
- Internal Presentations for HPC and Sales
- External slide set
- Sales slide set
- Web based training – Qtr 3 (Virtual University)

Key Strategies

- n Consistent quality criteria and measures
- n Knowledge sharing and re-use (Project Snapshots)
- n Sequence of activities and tasks
(Bid Plan, Design, Plan, Propose, Negotiate)
- n PM process measurements by phase, i.e., Quality Reviews
- n Quality reviews – process and content (local process)
- n PM Methodology for Project Managers

Quality in FocusPM

- n Review Criteria for each Tool / Output
- n Quality reviews in each FocusPM Phase and Activity

FocusPM: Scalable for All Projects

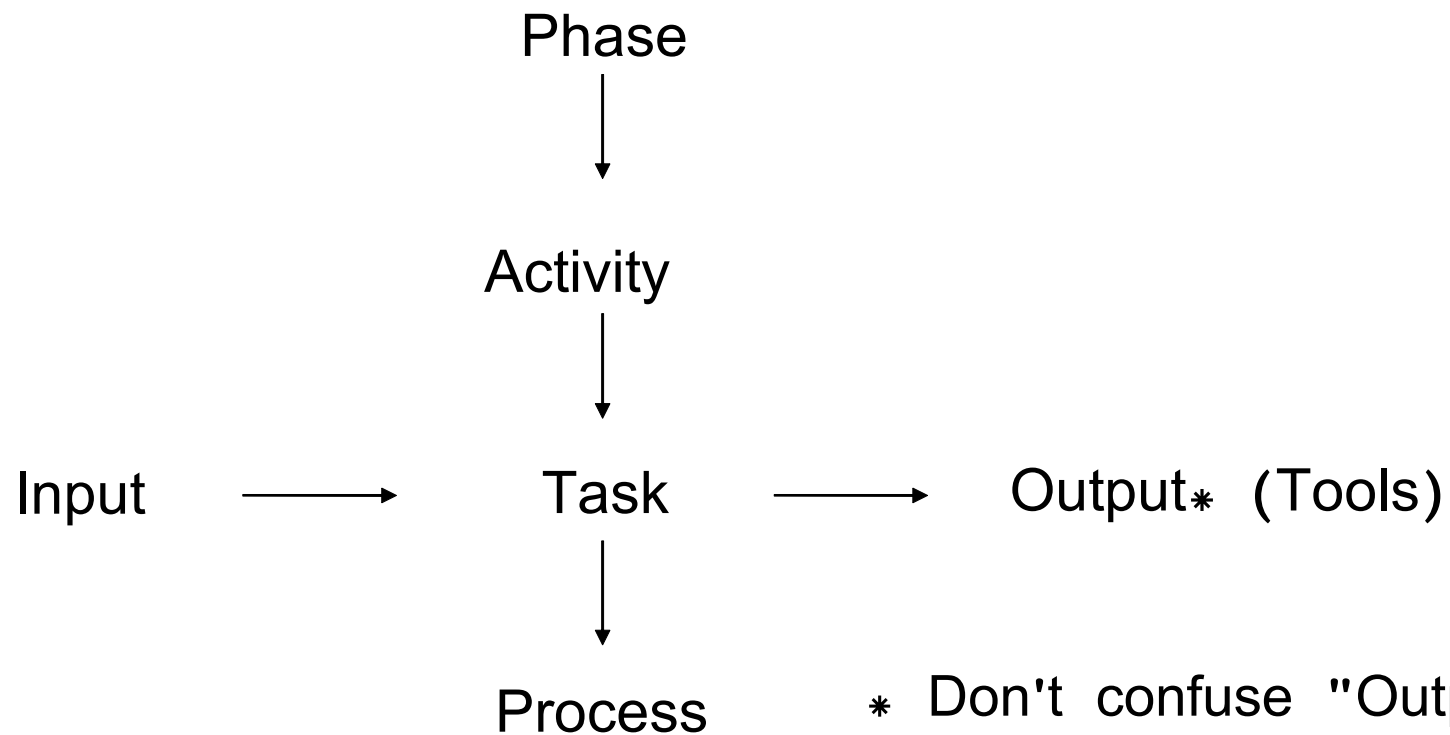

Very large, complex project

Medium-sized project

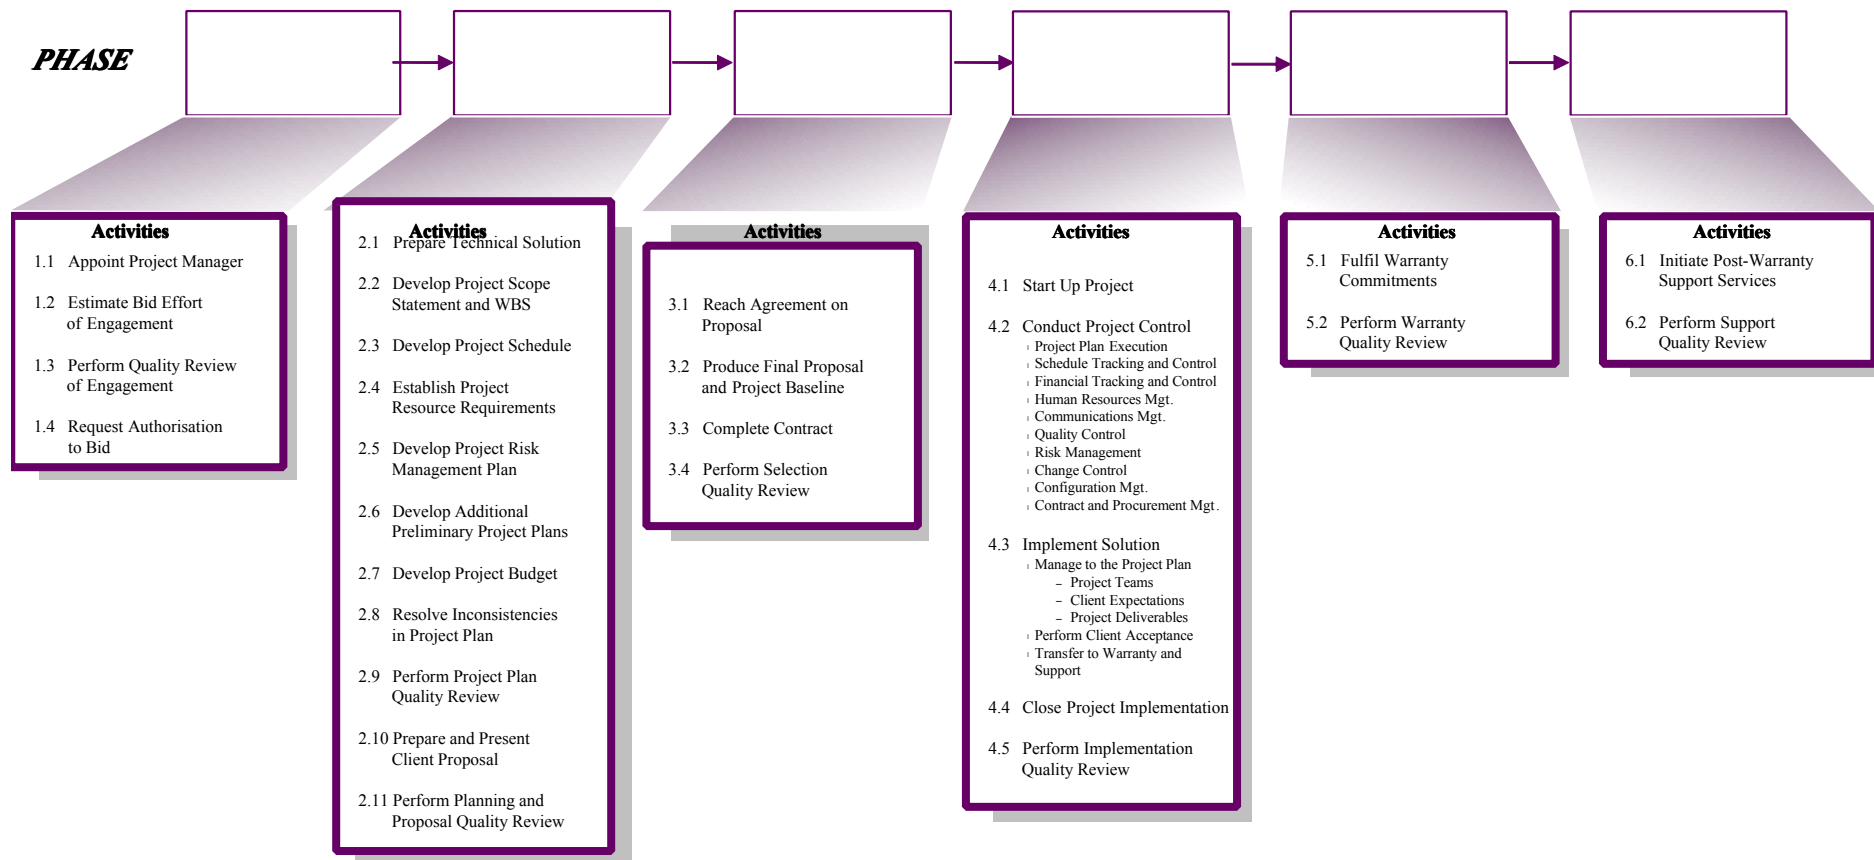

Small project

Methodology Structure of FocusPM

* Don't confuse "Output" with Client Deliverables

FocusPM Methodology Overview

Required Inputs

(From Principal Consultants, Solution Consultants)

- Local Authorisation Form
- Opportunity Investigation (AO, SBC, etc.)
- Request for Proposal (RFP)
- Invitation to Quote (ITQ)
- Signed Risk Opportunity and Analysis Model (ROAM)

**FocusPM
Methodology**

Improved
Win Ratio
and
Repeatable
Business

Key Business Points

"IT WILL CHANGE THE WAY WE DO BUSINESS" - Jim Sherriff

- n Following FocusPM is mandatory for PM's
- n The Project Plan content is used in the proposal
- n Planning components (Design and Project Plan) can be deliverable
 - templates in a consulting project
- n HP's service methodologies (from FOI's) are included in the development of the WBS
- n The Project Plan is the basis for the contract and becomes the Addendum to the contract – (Not the Proposal)
- n New Roles and Responsibilities for PM's and others
- n Scalability – all activities and tasks required

Key Business Points

(Continued)

n If required resources are not available, PM escalates the issues and stops the project

- Rescheduling occurs upon start-up

n Checkpoints in the FocusPM Bid Plan require Bid Plan management approval **before** proceeding to Project Plan – Implementation

- Proposal – Submission
- Client negotiated proposal changes
- Scope changes

The Project Manager is responsible for

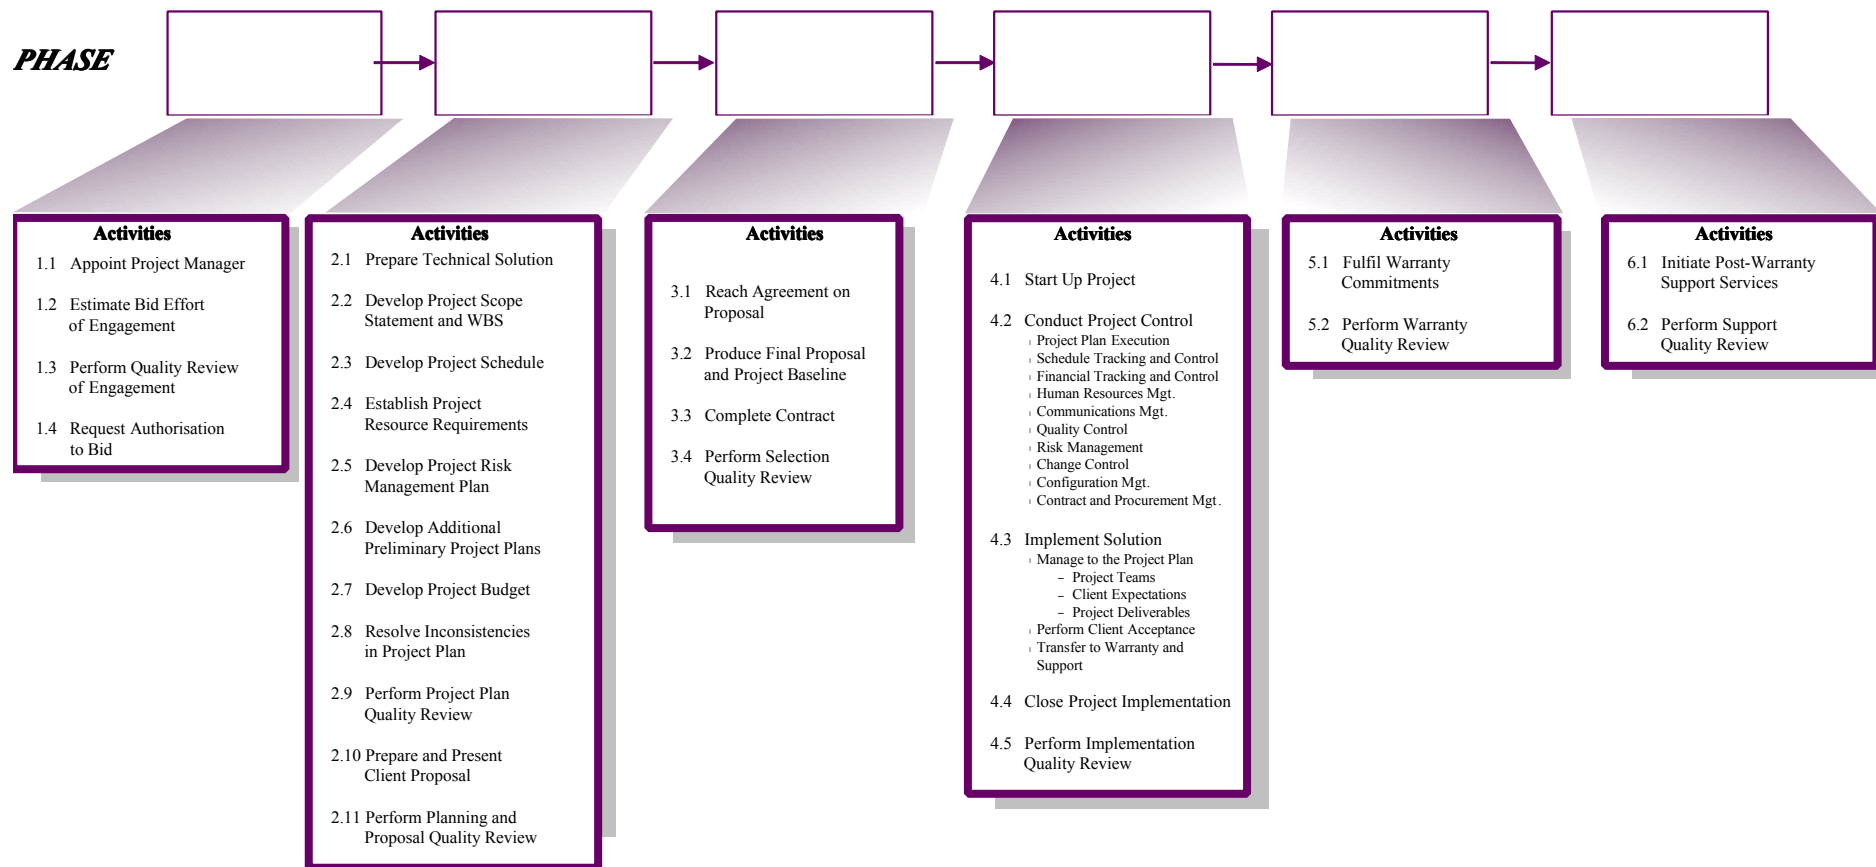

- n leading the delivery of large integrate solution and for key steps in the sale of solution
- n overall project plan, budget, schedule, staffing...
- n overall risk management and profitability
- n making a recommendation to management (GO/NO GO decision)
- n effectively applying the FocusPM Methodology to solution project

During the Project, the Project Manager

- n is the single point of contact with client
- n is the Business Manager for the project
- n is accountable for the agreed-upon margin for the project
- n manages all people resources on the project
- n is accountable to Senior Manager
- n must have all change control requests approved by HP Management and Client
- n provides performance feedback on all project team members at major milestones and project close-out --- aligned with HP Consulting Couselee Review Process

FocusPM Methodology Overview

1.0 Initiation Phase – Overview

Key Decision:
- HP's Response
to Client

Input

Local Authorisation Form
Opportunity Investigation
Request for Proposal (RFP)
Invitation to Quote (ITQ)
Risk and Opportunity Analysis Model (ROAM)

Activities

- 1.1 Appoint Project Manager
- 1.2 Estimate Bid Effort
- 1.3 Perform Quality Review of Engagement
- 1.4 Request Authorisation to Bid

Output

Project Manager Appointment
Client Requirements
Project Mission and Objectives
Bid Plan
Bid Quality Review
Local Authorisation Form

Key Decision:
- HP's Response
to Client

Objective: Manage HP's opportunity cost

Highlights of Initiation Phase

Project Mission and Objective

- n Project Background
- n Project Objective (Client)
- n Critical Success Factor
- n Exclusions
- n Key milestones
- n Constrain
- n HP Objectives

Highlights of Initiation Phase(Continued)

Risk Management begins in the Initiation Phase and continues throughout the other phases:

- n Sales team completes Risk and Opportunity Analysis Model (ROAM)
- n Stresses value of formalized risk assessment process versus gut feeling
- n Stresses control and profitability

Good decision:

- n Improved win/loss ratio
- n No bad projects!

Highlights of Initiation Phase

(Continued)

The Project Manager:

- n Is assigned early in the process
- n Reviews sales information on client and project
- n Creates Project Mission and Objectives
- n Develops Bid Plan
- n Recommends next step
- n May have an additional project review with client

Highlights of Initiation Phase

(Continued)

As input to Phase 1, the Sales Team:

- n Develops sales vision
- n Conducts client evaluation
- n Qualifies the Client:
 - Finds assurances that client can afford the solution
 - Determines whether client vision is compatible with HP mission
- n Develops initial risk analysis (ROAM)

Success Story: UK HP Consulting

- n 1 out of 10 projects progress from Initiation Phase to Planning and Proposal Phase
- n 3 out of 4 projects in the Planning and Proposal Phase progress to the Selection Phase
- n 4 out of 5 projects in the Selection Phase progress to the Implementation Phase

Overview of Initiation Phase

Key Decisions	<ul style="list-style-type: none">H Selection of Project Manager (1.1.1)H Bid Recommendation (1.4.1)
Review Points	<ul style="list-style-type: none">H Quality Review of Engagement (1.3)

2.0 Planning and Proposal Phase – Overview

Input

Approved Bid Plan
Local Authorisation Form
Client Information
Client Requirements
Project Information
Service Methodologies

Key Decisions:

- Design
- MOC Inclusions
- Risk
- Scope
- Project Plan
- ERP

Activities

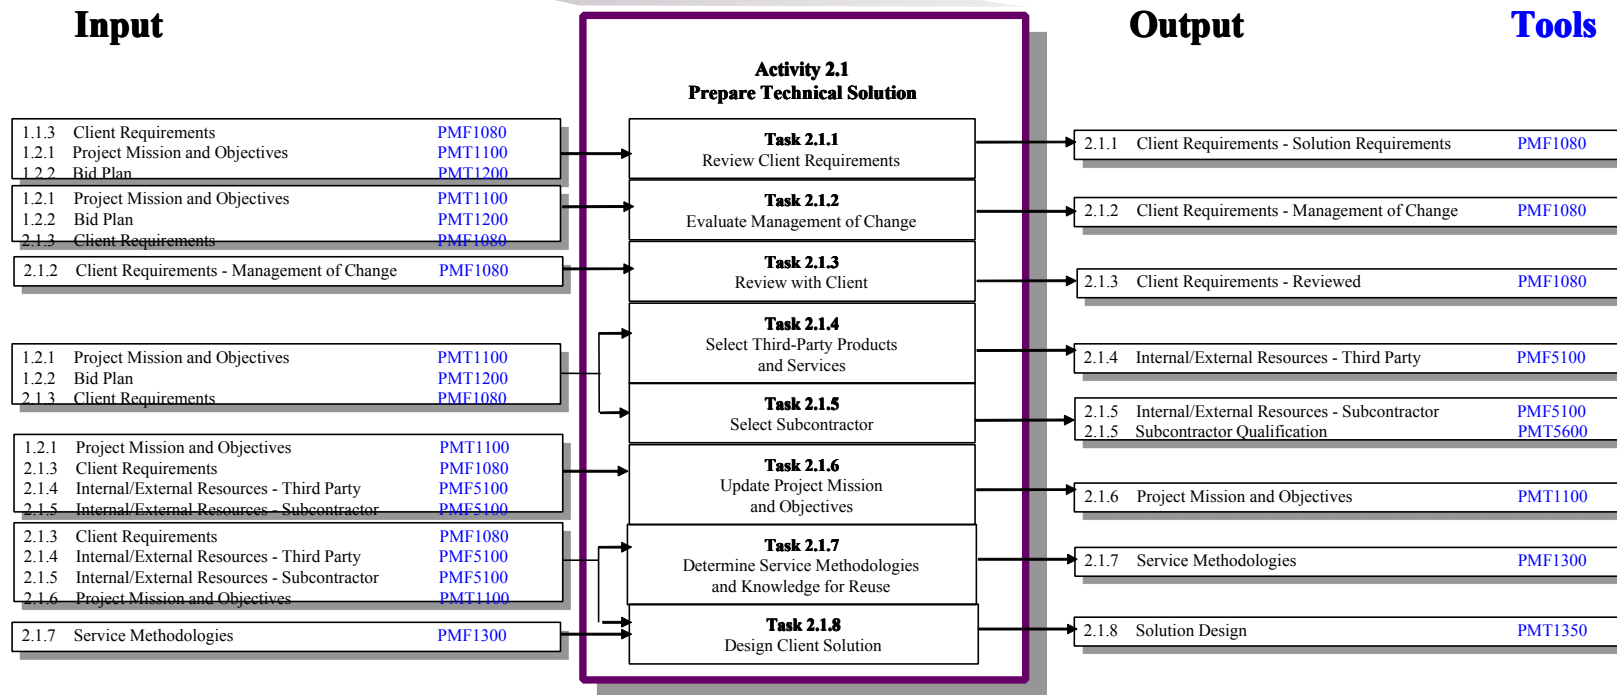

- 2.1 Prepare Technical Solution
- 2.2 Develop Project Scope Statement and WBS
- 2.3 Develop Project Schedule
- 2.4 Establish Project Resource Requirements
- 2.5 Develop Project Risk Management Plan
- 2.6 Develop Additional Preliminary Project Plans
- 2.7 Develop Project Budget
- 2.8 Resolve Inconsistencies in Project Plan
- 2.9 Perform Project Plan Quality Review
- 2.10 Prepare and Present
- 2.11 Perform Planning and Proposal Quality Review

Output

Solution Design
Scope of Work
Project Plan (Including Risk Plan,
Support Plan, and Warranty Plan)
Project File
Local Pricing Worksheet
Client Proposal
Local Authorisation Form
Project Plan/Proposal Quality Review

Objective: Design solution, develop project plan, and present a winning proposal

2.1 Prepare Technical Solution

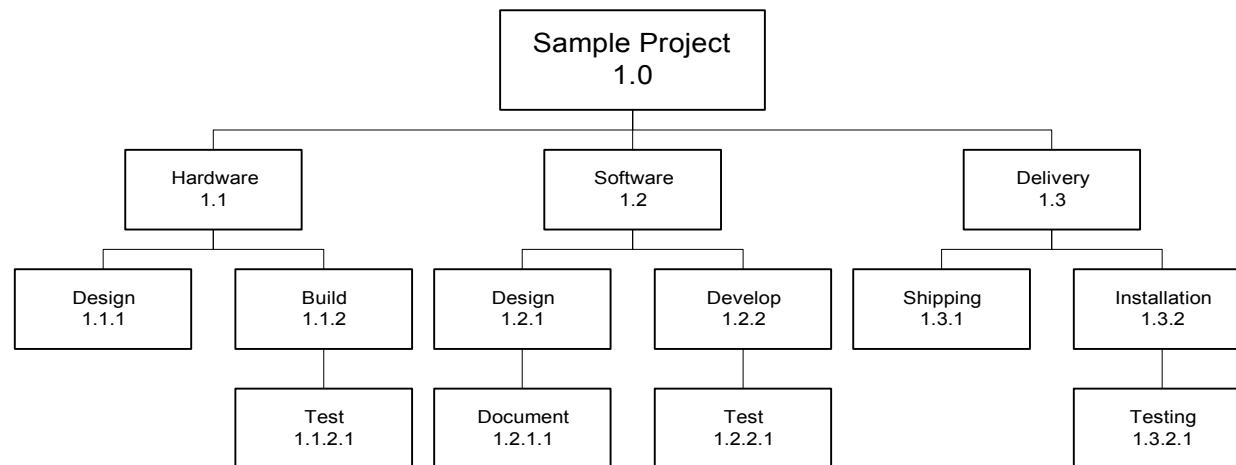

2.2 Develop Project Scope Statement and WBS

- n Concise definition of the project objectives
- n Overview of the end product, service, or system deliverables
- n Detailed description of the size, type, quantity and other pertinent characteristics of deliverable components
- n Solution Design overview
- n Project Milestones
- n Definition of HP and client responsibilities
- n Warranty and support requirements
- n Project exclusions
- n Description of scope change process

2.2.4 Develop Work Breakdown Structure

- n Clearly defined in terms of quality
- n Aligned with one resource or resource group
- n Estimated and tracked cost and timeline

2.3 Develop Project Schedule

ID	Task Name	Duration	Start	Finish	Predecessors	Resources	July	August	September	October	November
							Jul	Aug	Sep	Oct	Nov
1	Sample Project	67d	7/24/97	10/24/97							
2	Develop	45d	7/24/97	9/24/97							
3	Design	10d	7/24/97	8/6/97		Bob, Mary, John					
4	Approved	8d	8/6/97	8/6/97	3	Bob					
5	Build	30d	8/7/97	9/17/97	4	Mary, John					
6	Test	5d	9/18/97	9/24/97	5	John					
7	Deliver	22d	9/25/97	10/24/97							
8	Ship	10d	9/25/97	10/8/97	6	Kathy					
9	Install	10d	10/9/97	10/22/97	8	Larry					
10	Test	4d	10/21/97	10/24/97	9FF+2d	Mary					
11	Accepted	0d	10/24/97	10/24/97	10	Customer					

Effort/Duration

Effort and Duration estimates consist of the time available to complete the task and the resources required to complete the task within the available time frame.

Task Dependencies

Task dependencies establish the relationship between tasks. They can include SF-Start to Finish, SS-Start to Start, FF-Finish to Finish and FS-Finish to Start. Lead and Lag relationships are common.

Milestones

Milestones represent significant events in the project life cycle.

2.4 Establish Project Resource Requirement

The resource plan contains:

- n Resource Summary
- n Organizational Structure
- n Human Resource Plan
- n Performance management Practices
- n Transfer to Warranty Provisions
- n Mobilization Plan
- n Reference

2.5 Develop Project Risk Management Plan

- n Identify Project Risk
 - ã Technical Challenges
 - ã Legal Issues
 - ã Project Schedule
 - ã Regulatory Issue
 - ã Project Budget
 - ã Market Action
- n Risk Assessment Summary

2.6 Develop Additional Preliminary Project Plan

- n Quality Plan
- n Delivery Plan
- n Acceptance Plan
 - ã Testing plan
 - ã Acceptance Criteria and Procedures
- n Communication Management Plan
- n Warrant and Support Plan

2.7 Develop Project Budget

- n Develop Human Resource Cost
- n Estimate Materials and Supplies
- n Develop Mobilization Costs
- n Incorporate Risk management Costs
- n Establish Management Reserve
- n Define Client Value
- n Establish Solution Price

2.9 Perform Quality Review

- n Have the client requirements been adequately addressed in Solution design?
- n Has the Project Plan identified all of the work packages and resources required for delivering the solution?
- n Does the project organisation provide the necessary level of support and control?
- n Is the project time line adequate for the scope of work?
- n Have all of the project costs been identified and accurately estimated
- n Have all of the project risk factors been identified

3.0 Selection Phase – Overview

Input

Proposal
Project Plan
Risk Management Plan

Activities

- 3.1 Reach Agreement on Proposal
- 3.2 Produce Final Proposal and Project Baseline
- 3.3 Complete Contract
- 3.4 Perform Selection Quality Review

Output

Final Project Plan and Solution Proposal
Project Baseline
Close the Deal (Contract Signed)
Project Snapshot

Key Decisions:

- HP's Response to changes
- Contract T&C's

Objective: Win client business in support of HP's business objectives

4.0 Implementation Phase – Overview

Input

Scope of Work
Project Plan
Client Contract
Project File

Activities

- 4.1 Start Up Project
- 4.2 Conduct Program/Project Control
- 4.3 Implementation Solution
- 4.4 Close Project Implementation
- 4.5 Perform Implementation Quality Review

Output

Project Tracking and Control
Implemented Solution
Invoices
Client Acceptance of Solution
Client Evaluation of HP
Project Snapshot

Key Decisions:

- Performance
- Risk
- Acceptance
- Changes

Objective: Deliver project within time, budget, and scope while maximising client satisfaction

5.0 Warranty Phase – Overview

Input

Implemented Solution
Warranty Plan
Project Plan
Contract
Post-Implementation Report

Activities

- 5.1 Fulfil Warranty Commitments
- 5.2 Perform Warranty Quality Review

Output

Project Closeout
Warranty Services Delivered
Closeout Report
Transition to Appropriate Support

Objective: Provide warranty support to client's satisfaction

6.0 Support Phase – Overview

Input

Support Plan
Client Contract
Post-Implementation Report

Activities

- 6.1 Initiate Post-Warranty Support Services
- 6.2 Perform Support Quality Review

Output

Appropriate Documents Transitioned
Support Services Delivered

Objective: Provide contracted support services to client's satisfaction

How does FocusPM Benefit the Project Manager?

Productivity:

- n More efficient use of time
- n Less chance of burnout
- n Doesn't have to "re-invent the wheel" every time

Worldwide Methodology and Best Practices:

- n All Project Managers world-wide use the same methodology
- n Project team members all familiar with same methodology from day one
- n FocusPM is continually updated to include best practices

More Successful Projects:

- n Risk can be predicted and managed
- n Project Manager's recommendation is part of the qualification process

Team Satisfaction:

- n Framework for team integration
- n Structured Project Office environment

How does FocusPM Benefit the Client Business Manager, Principal Consultant and Account Representative?

- n Enables **Teaming** during selling process
- n Encourages **joint decision making**
- n Single point of contact throughout engagement
- n Reduced start-up time
- n Reduced cost of sales = higher profit! – Improves **win ratio** with rigorous Go / No Go decisions
- n Increased client satisfaction – **repeat business**
- n **Increased planning** in presales – leads to **successful delivery**

"A colleague you can rely on"
Project Managers will take responsibility

How does FocusPM Benefit our Clients?

- n Single point of contact throughout project life cycle
- n Clear project plan, SOW and deliverables
- n Quality delivery of solutions
- n On-time delivery of solutions
- n Control of cost and schedule by using a disciplined, formal process
- n Risk is managed by partnering with HP – risks can be shared by HP and the client
- n Defined process to manage change
- n HP can work in a more structured manner and appear more professional to the client
- n Proven methodology and Project Management capability world-wide

- 
- HEWLETT®

Why choose HP?

**HP's global
commitment and
knowledge /
experience**

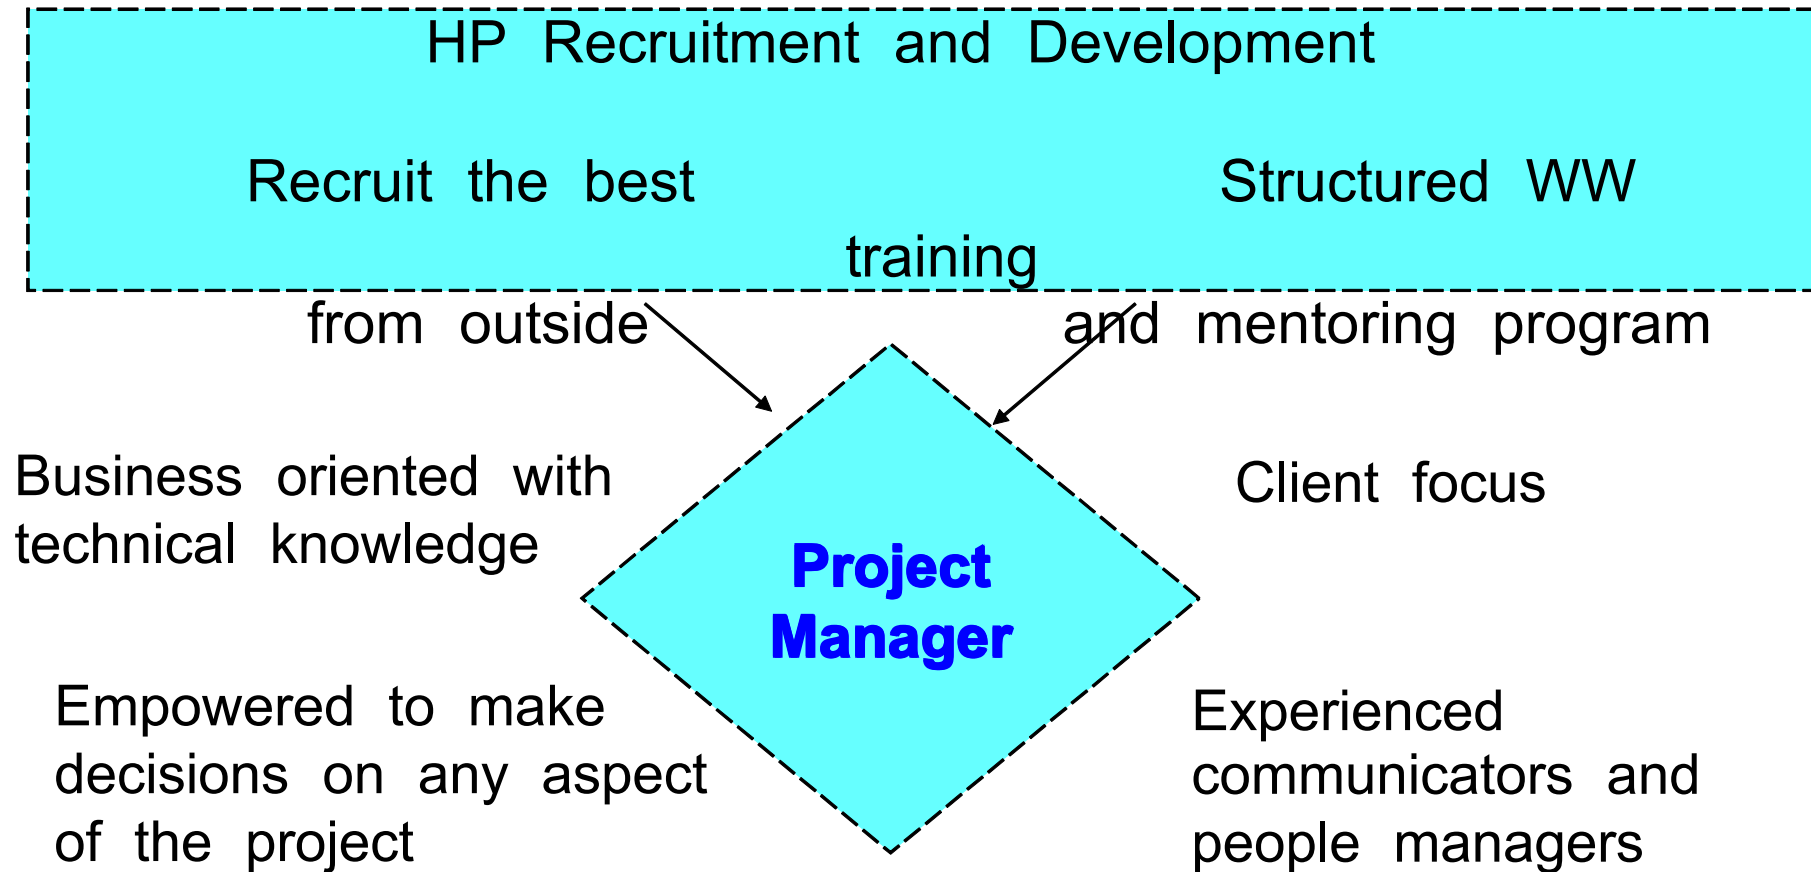

**Partnership at all
levels between
client and HP**

**"Best in Class"
Empowered
Project Managers**

**Structured approach
to project planning
and implementation**

**Agreed upon
achievable milestones
and quality
deliverables**

"Best in Class" Project Managers

HP Project Management Process

FocusPM Methodology → Includes:

- World-wide methodology
Entire planning and delivery process
- Process and tools
- Web based
- Meets PMI standard
- Capture and sharing of intellectual capital
- Auditing by peers
- Goals and objectives
 - Scope definition
- Client requirements based on rigorous needs assessment
- Communication strategy
- Risk management
- Scheduling and tracking

Partnering with HP

Joint Executive Sponsorship

Co-ownership of
Process and Outcomes

Joint Decision Making

Project Office

Shared Responsibility
for Risk
